Just hung up with Chief Royall. He was concerned with some of the language in the joint EPA-TCEQ statement. He wanted to know if we had released it and said there was some language that could compromise operational security. I told him it was not released, and I asked him if he'd be willing to send us his comments on the statement. He will be sending me his comments.

He confirmed that the mission is scuttled for tonight.

Ashley

I just heard it's a no go due to safety concerns. Checking whether there will be additional information forthcoming this evening.
